## The Advantage Medical Promise:

*If, after completion of our analysis, we are unable to save you 10% on your annual expenditures toward core products, we will pay you \$1,000.00 as compensation for the time required to provide us with your data.*

### Advantage Medical will provide a complete, NO COST, materials management analysis for your clinic(s) as follows:

- A detailed, 6 - 12 month spreadsheet (based upon amount of data provided to us), analyzing product usage in the aggregate for each month.
- Identify core products, reduce prices on those products by 10%, and quantify the savings on an annual basis. (Core products are defined as items that, in the aggregate, are purchased monthly or almost monthly. These are your most widely used products.)
- Identify and suggest potential alternate products that would provide cost savings while retaining quality and function, and quantify that savings on an annual basis.
- Analyze purchasing patterns and frequency of ordering to save time and reduce procurement costs and freight costs.

**Additionally, Advantage Medical will provide, at no cost, our web-based software tool (ePurchase 360°) that provides complete centralized management and control of the multi-location purchasing process from start to finish. This tool is fully customizable to meet the unique needs of your organization.**

\*Only 10 clinics will be accepted, so **ACT NOW** and contact Jeff Worrell.
